2- Acquisition/ Learning Hypothesis: 'Adults have two distinctive ways of developing competences in second languages .. acquisition, that is by using language for real communication (natural environment) ... learning .. "knowing about" language'

Affect in Language Learning: Motivation - Nada's Island

Language learning strategies is a term referring to the processes and actions that are consciously deployed by language learners to help them to learn or use a language more effectively. They have also been defined as 'thoughts and actions, consciously chosen and operationalized by language learners, to assist them in carrying out a multiplicity of tasks from the very outset of learning to ...

Language learning strategies - Wikipedia

Success in second language learning is often related to the concept of 'motivation'. Motivation is the most used concept for explaining the failure or success of a language learner. Second language (L2) refers to a language an individual learns that is not his/her mother tongue, but is of use in the area of the individual. It is not the same as a foreign language, which is a language ...

Motivation in second-language learning - Wikipedia

After reading this article, I now have a better appreciation of how important it is to understand information processing. I appreciate the simplicity and the clear and concise explanation of how the instructional designer can facilitate learning how to learn by incorporating the suggested strategies.

To help you decide which responses to select, we would like to explain what is meant by each term. By Not at all typical of me, we do not necessarily mean that the statement would never describe you, but that it would be true of you only in rare instances.; By Not very typical of me, we mean that the statement generally would not be true of you.

Language Learning Strategies: An Overview for L2 Teachers

John Hattie developed a way of synthesizing various influences in different meta-analyses according to their effect size (Cohen’s d). In his ground-breaking study “Visible Learning” he ranked 138 influences that are related to learning outcomes from very positive effects to very negative effects. Hattie found that the average effect size of all the interventions he studied was 0.40.
