Chromatography is a laboratory technique for the separation of a mixture. The mixture is dissolved in a fluid called the mobile phase, which carries it through a structure holding another material called the stationary phase. The various constituents of the mixture travel at different speeds, causing them to separate.

ABSTRACT. Verbascum thapsus L. [Khardhag or Common mullein], a member of the family Scrophulariaceae, is a famous herb that is found all over Europe, in temperate Asia, in North America and is well-reputed due to its medicinal properties. This medicinal herb contains various chemical constituents like saponins, iridoid and phenylethanoid glycosides, flavonoids, vitamin C and minerals.

Vegetable oils are triglycerides extracted from plants. These oils have been part of human culture for millennia. Edible vegetable oils are used in food, both in cooking and as supplements. Many oils, edible and otherwise, are burned as fuel, such as in oil lamps and as a substitute for petroleum-based fuels. Some of the many other uses include wood finishing, oil painting, and skin care.

List of vegetable oils - Wikipedia

Lantana camara is the one of the ten worst weeds of the world belonging to the family Verbenaceae. Lantana forms huge dense thickets on the floor of forest and plantation areas due to its scrambling growth patterns and bushy nature which hampers normal function of the forest and the growth and development of other underlying vegetation (Iyenger 1933; Singh et al., 1988) as reported in Fig. 1.
