Ecology (from Greek: *oikos*, "house", or "environment"; *logos*, "study of") is the branch of biology which studies the interactions among organisms and their environment. Objects of study include interactions of organisms with each other and with abiotic components of their environment. Topics of interest include the biodiversity, distribution, biomass, and populations of organisms ...

Ecology - Wikipedia

In ecology, a community is a group or association of populations of two or more different species occupying the same geographical area and in a particular time, also known as a biocoenosis. The term community has a variety of uses. In its simplest form it refers to groups of organisms in a specific place or time, for example, "the fish community of Lake Ontario before industrialization".

1. Introduction. The first reports of plastics litter in the oceans in the early 1970s (Fowler, 1987, Carpenter et al., 1972, Carpenter and Smith, 1972, Coe and Rogers, 1996, Colton and Knapp, 1974) drew minimal attention of the scientific community. In the following decades, with accumulating data on ecological consequences of such debris, the topic received increasing sustained research interest.
