Memory is the faculty of the brain by which information is encoded, stored, and retrieved when needed.. Memory is vital to experiences, it is the retention of information over time for the purpose of influencing future action. If we could not remember past events, we could not learn or develop language, relationships, or personal identity (Eysenck, 2012).

An Excellent Alternative to Adobe Reader. PDF-XChange has some very nice features not found in Adobe Reader, but where it matters it follows the familiar shortcuts and layout of the established market leader. It is very customisable too, so if you don't like the defaults, many things can be modified.

Background and Purpose—Persons with cognitive impairment, as assessed by cognitive tests, are at a higher risk of stroke. Subjective memory complaints might be an earlier marker for stroke, especially in persons with higher education. Their cognitive reserve might mask their cognitive impairment during cognitive testing. In a population-based setting, we investigated the association between ...
